## Work Experience

### Spiderweb Technologies | Frontend Developer Intern

Mar 2025 - Apr 2025

- Developed a DocuSign-like feature from scratch in 45 days, enhancing document signing capabilities for users
- Collaborated with team members to resolve bugs using JavaScript and TypeScript, improving application stability and user experience
- Utilized the MERN stack and AWS to build scalable web applications, enhancing performance and deployment efficiency

### PodQuake | Freelance Podcast Audio Editor

2020 - 2023

- Automated audio workflows reducing post-production time by 50% using Reaper and Descript
- Edited over 500 episodes for various clients across 3 - 4 years
- Acquired 3-5 high-ticket clients via organic marketing & referrals

## PROJECTS

### Creator Fan Chat | Subloop

- Developed a full-stack app using MERN stack with real-time chat and authentication features
- Integrated Razorpay payment gateway for UPI payment option, because Stripe lacked UPI
- Designed responsive UI using Tailwind CSS and implemented dark/light mode theme
- Made creator dashboard with Zustand for efficient state management
- Enabled fans to talk to their favorite creators and make creators 90% revenue per sale
- Github- <https://github.com/saurav981/Subloop> | Live app- <https://subloop-frontend.onrender.com>
- Demo video- <https://youtu.be/9SHkXQzMqik>

### Income Tax Calculator | Calspot

- Built a responsive tax calculator web app using React and Tailwind
- Simplified income tax calculation for the new tax regime
- Applied dark mode using Tailwind CSS for theme switching
- Github- <https://github.com/saurav981/Income-Tax-Calculator>
- Live app- <https://income-tax-calculator-goay.onrender.com>

### WordPress + AI | SEO Growth (250k Visitors)

- Grew site traffic from 0 ' 250k monthly visitors using SEO, AI, and automation
- Used OpenAI API + Google Sheets to automate content creation
- Hosted on DigitalOcean for optimized performance & fast load speeds
- Live site- <https://podquake.com>

## SKILLS
