Saurav Halder

Fullstack Developer (Backend focus)

+91 9954245718 | [Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full Stack developer with a Backend focus who loves building web applications that are both functional and easy to use. I work with MERN and enjoy solving problems through clean, efficient code. I love building practical solutions and learning by doing.

EXPERIENCE

Frontend Developer Intern – Tvara   **Remote | Aug - Sep 2025**
- Fixed UI bugs, made everything responsive, improved performance by 15%.
- Collaborated with the team to deliver features on time.

Software Developer Intern – Spiderweb Technologies   **Remote | Mar - Apr 2025**
- Built backend for a document signing feature using Node.js and Express in 45 days
- Resolved JavaScript bugs in collaboration with the team, improving stability and UX
- Integrated AWS S3 for document storage and optimized database queries, improving response times

Podcast Editor – Freelance   **Remote | 2020 - Present**
- Automated workflows and cut editing time by 50% using Descript
- Edited 500+ episodes for multiple clients over 3 - 4 years
- Secured 4 inbound clients through social media, SEO & referrals

PROJECTS

SocialAuto |Work in progress   **September 2025**
Tools: BullMQ, Redis, Node, Express, MongoDB, React, Tailwind
- Building a tool that auto generates content & posts on social media based on user preferences and schedule
- Implemented BullMQ for background job to handle scheduled posts without blocking the main server
- Supports adding multiple businesses, and multiple social platforms (IG, X, Linkedin) under each business
- Designed automated scheduling logic where users configure once (business details, content goal, schedule)
- Challenges: Meta API post permission, designing autopost logic, supporting multiple business & social platforms

Subloop |[Code](#)| [Link](#) |[Demo](#)   **November 2024**
Tools: React, Tailwind, Daisy UI, Websocket, Zustand, Razorpay, Node, Express, MongoDB
- Developed a full-stack app using MERN stack with real-time chat and authentication features
- Designed MongoDB schema and created RESTful APIs with Express
- Implemented user authentication with JWT and integrated Razorpay payment gateway

PodQuake |[Link](#)   **December 2023**
Tools: Wordpress, SEO, OpenAI, Google Sheets
- Grew site traffic from 0 - 250k monthly visitors using SEO, AI, and automation
- Used OpenAI API + Google Sheets to automate content creation
- Hosted on DigitalOcean for optimized performance & fast load speeds

SKILLS

- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, PostgreSQL, Redis
- **Tools:** Docker, AWS, Git, Postman, BullMQ
- **Frontend:** React.js, TailwindCSS, HTML, CSS
- **Languages:** JavaScript, TypeScript

EDUCATION

- B.Com, **Tezpur University**   **July 2019**
